

Why Sierra Wireless Embedded Solutions?

If you are building wireless IoT devices to connect on cellular, short-range, or GNSS networks, you want to work with experts - people who you can trust, who understand that innovation and time-to-market are critical to your success.

GET CONNECTED. STAY CONNECTED.

>130 Million

IoT devices embed Sierra Wireless modules

2 of the Top 3

PC & Tablet Makers

embed Sierra Wireless modules enabling road warriors to stay connected

The Top 3

Smart Meter Manufacturers

rely on Sierra Wireless modules to manage and monitor energy usage

3 of the Top 5

Automotive OEMs

trust Sierra Wireless modules to deliver value-add services to drivers and passengers

3 of the Top 5

Security Service Providers

depend on Sierra Wireless modules to improve safety and security for homeowners and businesses

All of the Top

Cellular Router Makers

embed Sierra Wireless modules to connect mobile workers, enterprises and industrial assets

Sierra Wireless is the world's #1 vendor of embedded modules for the 6th year in a row

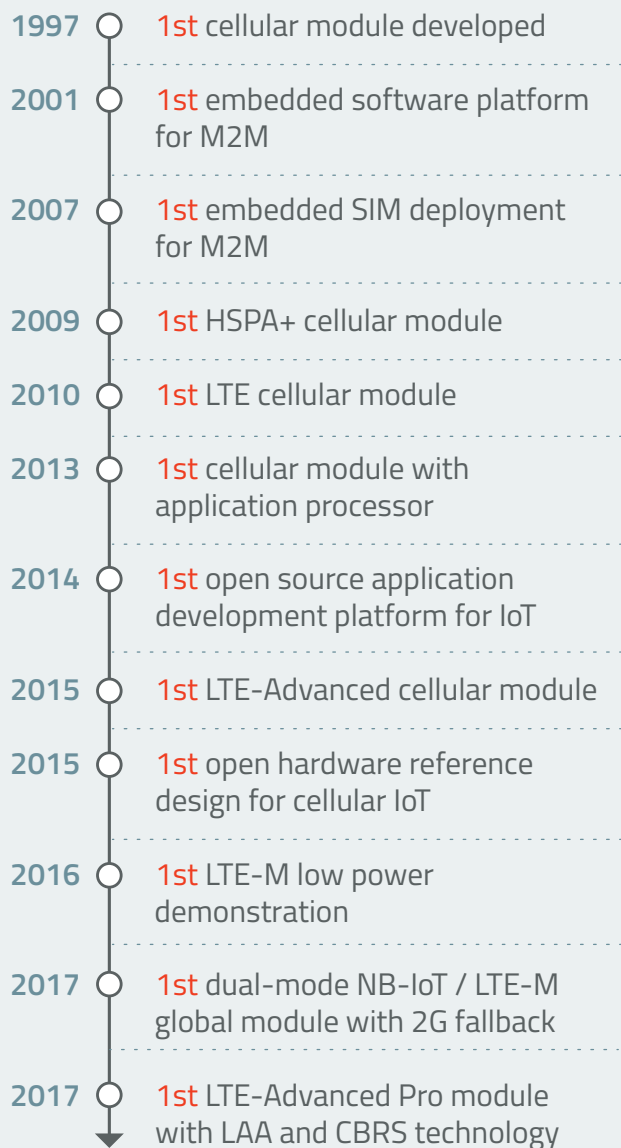

Source: ABI Research Report, 2017

>20 years wireless experience

Start with Sierra to deliver new technology solutions, streamline deployments and take advantage of all the promise the IoT offers. Start with Sierra, stay with Sierra and build your future in the Internet of Things.

#1 in Innovation

Recognized as

#1 embedded module market share

for the 6th year

Source: ABI Research Report, 2017

130 million
devices shipped worldwide

80+ networks
supported globally

400+ patents
in wireless technologies

130+ countries
where our products and services are deployed

\$75M+ invested annually in R&D
with development teams on **3 continents**
