AIRLINK® PROFESSIONAL SERVICES

Benefits

- **Faster time to success delivered on-time and on budget**
- **Complex implementations that work right the first time**
- **Capitalize on your investment while leveraging current and future technologies**

Maximize your investment & future proof your network

AirLink Professional Services helps municipalities, utilities and corporations create a reliable and secure enterprise networking infrastructure for mission-critical applications, by delivering a set of standard services for your AirLink solutions. Custom services solutions are also available based on your specific requirements.

Our Professional Services experts are well-versed in the latest enterprise networking and security standards. Harvesting experience and lessons-learned over thousands of customer deployments, our best practices are expertly tailored to help you architect and deploy your cutting-edge AirLink solutions. Our team consists of highly experienced, industry certified technical experts and project managers with years of experience in secure enterprise networking and device integration.

Using a proven, structured approach you will have a faster time to success, minimize system installation and downtime, and your projects will be completed on time and on budget.

AirLink Professional Services Offerings

Complex problems often require complex solutions and networking environments are no exception. The time and effort involved in deploying and maintaining new capabilities across multiple technology product domains can be challenging. Our services can help simplify the way you deploy Sierra Wireless solutions while freeing up your staff to focus on more strategic initiatives. As with any complex networking system, expert planning, testing, and implementation are critical to ensure that the solution meets the organization's business, technical, and operational requirements. Combining a phased project management methodology and a highly-skilled technical staff, the team is your trusted advisor for:

- Implementation & New Deployments
- Maintenance & Optimization for existing deployments
- Training Services for new and existing deployments
- Custom Services

THESE OFFERINGS ARE BEST APPLIED TO:

Large deployments in public safety, utility, government and commercial organizations

Mobile fleet deployments including vehicle area networks (VANs)

Deployments with multiple wide-area-networks (multi-WAN environments)

Deployments with stringent security requirements

Working with organizations that lack technical expertise or manpower
