

# Managed Connectivity Solutions for Industrial Applications

Smart Grid and Pipelines

Construction and Job Site Management

Agriculture, Farming and Food Production

HVAC and Industrial Equipment Monitoring

Industrial IoT applications in remote, harsh and demanding environments require solutions designed specifically to meet the challenges of these environments. The Managed Connectivity Solutions (MCS) for Industrial applications delivers fully managed, end-to-end wireless broadband solutions, with flexibility for your specific requirements. The solution provides critical connectivity suitable for permanent, temporary, primary and back-up needs.

## Sierra Wireless Managed Connectivity Solutions (MCS) Benefits

### Turnkey solution, optimized for your environment

Sierra Wireless automatically predicts and recommends the optimal wireless connection, based on your deployment sites. Connectivity is tested upon deployment, ensuring the highest quality wireless connection available. Our solution runs on best-in-class AirLink® routers, purpose-built rugged hardware, ready to be deployed in the most demanding environments, with proactive monitoring and troubleshooting.

### Connectivity as a Service, delivered

With MCS there is no equipment to purchase and everything is included in one monthly price. When time to revenue or productivity is critical, MCS delivers the fastest time to operation, while easily scaling up or down as needed.

### Meets your specific operational needs

Flexibility in contract terms means you can find the right solution for your needs — whether you need a short-term, monthly contract or have a longer-term need. MCS provides temporary LTE connectivity for special projects or construction sites, as well as backup connectivity when downtime is not an option.

## Why Sierra?

With a rich 25-year history of innovation and proven reliability — Sierra Wireless has deployed over 3 million routers globally. We help drive digital transformation, connecting businesses with critical data to save money and create new revenues.

### AIRLINK® ROUTERS

## Best-in-Class AirLink® Rugged Routers for Managed Connectivity Solutions

- Rugged MIL-STD hardware platforms for the most demanding industrial and critical infrastructure applications
- Class 1, Division 2 certified, ideal for hazardous environments
- Exceeds the MIL-STD-810G specification for shock, vibration, temperature and humidity
- Fully enclosed die cast aluminum sealing to combat dusty environments
- Compact form factor fits in limited space areas
- Low power to suit limited power installations
- VPN tunneling to support secure communications

## Industry's Best Connectivity — Simplified

### Top nationwide coverage

Sierra Wireless works with all 3 major US carrier networks to provide the best quality and coverage for your needs.

### Lower data costs

We lower your costs by creating a single company-wide data pool for your multi-site network.

### Single point of contact across all networks

All your wireless support (hardware, software and connectivity) is provided by Sierra Wireless, eliminating the need to contact multiple vendors. Or get dedicated resources that will manage your portfolio of AirLink devices.

### Flexible contracts

A variety of monthly to yearly plans are available with different contract terms, to provide you with the right choice for your deployment needs.

## Professional Device Management and Support

### Proactive device management

Through Sierra Wireless managed services, we monitor device health 24/7/365 and perform regular updates.

### Real-time reporting

MCS delivers real-time device and connectivity information for valuable insights into your network health and data usage.

### Expert customer care

Our wireless experts and service engineers are available 24/7/365 to assist you with any concerns or questions via phone or email. Our close relationships and direct access to the top U.S. carriers ensures flawless services and quick time to resolution, should issues arise.

### About Sierra Wireless

Sierra Wireless (NASDAQ: SWIR) (TSX: SW) is the leading IoT solutions provider that combines devices, network and software to unlock value in the connected economy. Companies globally are adopting IoT to improve operational efficiency, create better customer experiences, improve their business models and create new revenue streams. Whether it's a solution to help a business securely connect edge devices to the cloud, or a software/API solution to help manage processes associated with billions of connected assets, or a platform to extract real-time data to make the best business decisions, Sierra Wireless will work with you to create the right industry-specific solution for your next IoT endeavor. Sierra Wireless has more than 1,300 employees globally and operates R&D centers in North America, Europe and Asia.
