What is FirstNet®?
FirstNet keeps first responders and communities safe.

How does FirstNet work?
FirstNet® is a dedicated, high-speed, wide-area communications platform using LTE cellular technologies. FirstNet® has its own core network and SIM cards.

What are the benefits of FirstNet?

- BETTER COVERAGE IN RURAL AREAS
- BETTER PENETRATION THROUGH BUILDINGS

What is Band 14?
Band 14 is the dedicated frequency spectrum for public safety in the 700 MHz band with key advantages.

How do I do now that my state has opted-in?
If you need help to determine your next step with FirstNet®, or if you are interested in a cellular coverage assessment, please contact Sierra Wireless today.

Why Start with Sierra to connect your public safety fleet?
20 years of field-proven experience in public safety.

Band 14, combined with Priority and Preemption, gives first responders priority access to the network when commercial networks are congested.

Priority and Preemption are two features of FirstNet® that give first responders priority access to voice, data and video communication when commercial networks are congested.

Priority puts first responders at the front of the line.

Preemption removes other users from the highway, giving first responders access to all the lanes they need.

What is FirstNet®?
FirstNet keeps first responders and communities safe.
