

FASTrack Fleet: Fleet Tracking Solution Bundled Technology Offering for Resellers

Sierra Wireless Asset Tracking Service

Increased ROI, improved productivity and enhanced safety of employees and assets are just a few of many reasons companies are deploying fleet tracking solutions. Still, some business owners have not deployed a solution due to concerns of complexity or cost. Sierra Wireless breaks those barriers with a turn-key, economical solution.

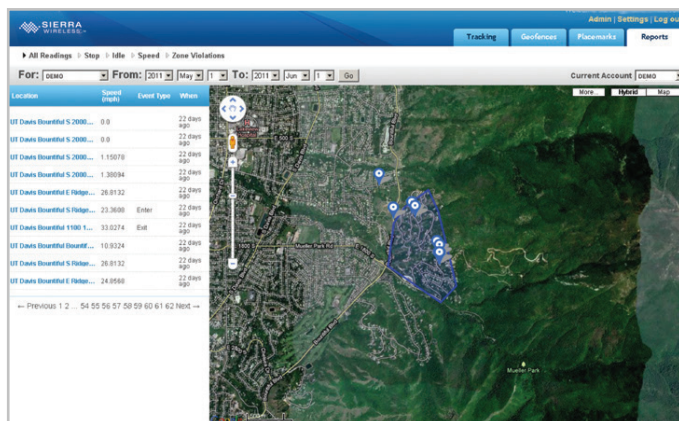

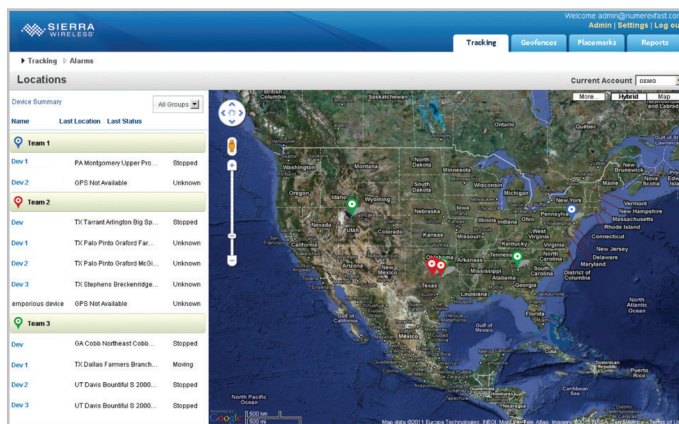

QUICK DEPLOYMENT, DIFFERENTIATED SERVICE

The Fleet Tracking Solution includes a configurable web-based application, a proven messaging transportation network and a choice of devices. This bundled solution accelerates speed to market and ensures a simple and flexible implementation. Optional service offerings, like Vehicle Disable and Sensors, provide your customers enhanced value and give you the opportunity to generate additional revenue. With Sierra Wireless as your technology partner, you can focus on building your business and exceeding customer expectations.

INNOVATIVE SOLUTIONS FROM ONE PARTNER

Sierra Wireless is a leading provider of wireless business services, technology and products used in the development and support of IoT solutions for enterprise and government markets worldwide. Our approach is what sets Sierra Wireless apart from typical MVNO's and service providers.

SIMPLE, POWERFUL, CONFIGURABLE

Administrative Controls – Thoughtfully designed to ensure ease of use and give you control of users, devices and information.

Measuring Unit Options – Users can select Metric or English units.

Vehicle Disable – Help ensure asset security and recovery. This optional feature allows the administrator to remotely disable a vehicles ignition.

GSM & Satellite Devices – A variety of devices allows for ultimate deployment flexibility.

Panic Alerts – Help ensure employee safety with available panic button integration. In an emergency, the driver can activate a panic alert which can be seen and actively managed in the application.

Geofence Violation Alerts – Geofences can be established down to the device level and the polygonal feature lets you create very detailed boundaries.

Speed Alerts – Safe driving is good business, get notified when a driver's speed is excessive.

Stop & Idle Reports – Unscheduled stops and excessive idling cost the company money. Clear expectations coupled with detailed reporting help mold good driver behavior.

Placemarks – Create, save and display important places on the map.
