Sierra Wireless Investor Day 2019

Cautionary Note Regarding Forward-Looking Statements

Certain statements and information in this presentation are not based on historical facts and constitute forward-looking statements within the meaning of applicable securities laws ("forward-looking statements"). These forward-looking statements may include statements and information relating to our Q1'19 Corporate Update and fiscal 2019 business outlook and beyond; expectations regarding the Company's cost savings initiatives; statements regarding our strategy, plans, long-term revenue targets, goals, objectives, expectations and future operating performance; the Company's liquidity and capital resources; the Company's financial and operating objectives and strategies to achieve them; general economic conditions; estimates of our expenses, future revenues, non-GAAP earnings per share and capital requirements; our expectations regarding the legal proceedings we are involved in; statements with respect to the Company's estimated working capital; expectations with respect to the adoption of IoT solutions; expectations regarding trends in the IoT market and wireless module market; expectations regarding product and price competition from other wireless device manufacturers and solution providers; and our ability to implement effective control procedures. In particular, this presentation contains our five-year revenue targets which are forward-looking statements and are subject to the assumptions, risks and uncertainties described below. Forward-looking statements are provided to help you understand our current views of our short and longer term plans, expectations, and prospects. We caution you that forward-looking statements may not be appropriate for other purposes. We do not intend to update or revise our forward-looking statements unless we are required to do so by securities laws.

Forward-looking statements typically include words and phrases about the future, such as: "target", "outlook", "will", "may", "estimates", "intends", "believes", "plans", "anticipates" and "expects", and similar expressions are not promises or guarantees of future performance. They represent our current views and may change significantly. In particular, forward-looking statements that relate to longer periods of time, such as our five-year revenue targets, are subject to substantial uncertainties and could prove to be significantly wrong. Forward-looking statements are based on a number of material assumptions, including, but not limited to, those listed below, which could prove to be significantly incorrect:

- our ability to develop, manufacture and sell new products and services that meet the needs of our customers and gain commercial acceptance;
- our ability to continue to sell our products and services in the expected quantities at the expected prices and expected times;
- expected macro-economic business conditions;
- expected cost of sales;
- expected component supply constraints;
- our ability to win new business;
- our ability to fully integrate the business, operations and workforce of Numerex Corp. ("Numerex") and to return the Numerex business to profitable growth and realize the expected benefits of the acquisition;
- our ability to integrate other acquired businesses and realize expected benefits;
- expected deployment of next generation networks by wireless network operators;
- our operations not being adversely disrupted by other developments, operating, cyber security, litigation, or regulatory risks; and
- expected tax and foreign exchange rates.

Forward-looking statements are based on our management's current expectations and we caution investors that forward-looking statements, particularly those that relate to longer periods of time are subject to substantial known and unknown material risks and uncertainties. Many factors could cause our actual results, achievements and developments in our business to differ significantly from those expressed or implied by our forward-looking statements, including, without limitation, the following factors, which are discussed in greater detail. These risk factors and others are discussed in our Annual Information Form and Management's Discussion and Analysis of Financial Condition and Results of Operations, which may be found on SEDAR at www.sedar.com and on EDGAR at www.sec.gov and in our other regulatory filings with the Securities and Exchange Commission in the United States and the provincial securities commissions in Canada:

- competition from new or established competitors or from those with greater resources;
- the loss of, or significant demand fluctuations from, any of our significant customers;
- our business transformation initiatives may result in disruptions to our business and may not achieve the anticipated benefits
- our ability to attract or retain key personnel and the impact of organizational change on our business;
- deterioration in macro-economic conditions and resulting reduced demand for our products and services;
- risks related to the acquisition and ongoing integration of Numerex;
- disruption of, and demands on, our ongoing business and diversion of management's time and attention in connection with acquisitions or divestitures;
- cyber-attacks or other breaches of our information technology security;
- risks related to the transmission, use and disclosure of user data and personal information;
- our financial results being subject to fluctuation;
- our ability to respond to changing technology, industry standards and customer requirements;
- risks related to infringement on intellectual property rights of others;
- our ability to obtain necessary rights to use software or components supplied by third parties;
- our ability to enforce our intellectual property rights;
- our reliance on single source suppliers for certain components used in our products;
- failures of our products or services due to design flaws and errors, component quality issues, manufacturing defects, network service interruptions, cyber-security vulnerabilities or other quality issues;
- our dependence on a limited number of third party manufacturers;
- unanticipated costs associated with litigation or settlements;
- our dependence on mobile network operators to promote and offer acceptable wireless data services;
- risks related to contractual disputes with counterparties;
- risks related to governmental regulation;
- risks inherent in foreign jurisdictions; and
- risks related to tariffs or other trade restrictions.

Investors are cautioned not to place undue reliance on these forward-looking statements. No forward-looking statement is a guarantee of future results.

Leading Portfolio Targeting Two Growth Opportunities

IOT SOLUTIONS

Industrial
Networking

Many 100M's of endpoints to be connected

\$2B+ global market and growing

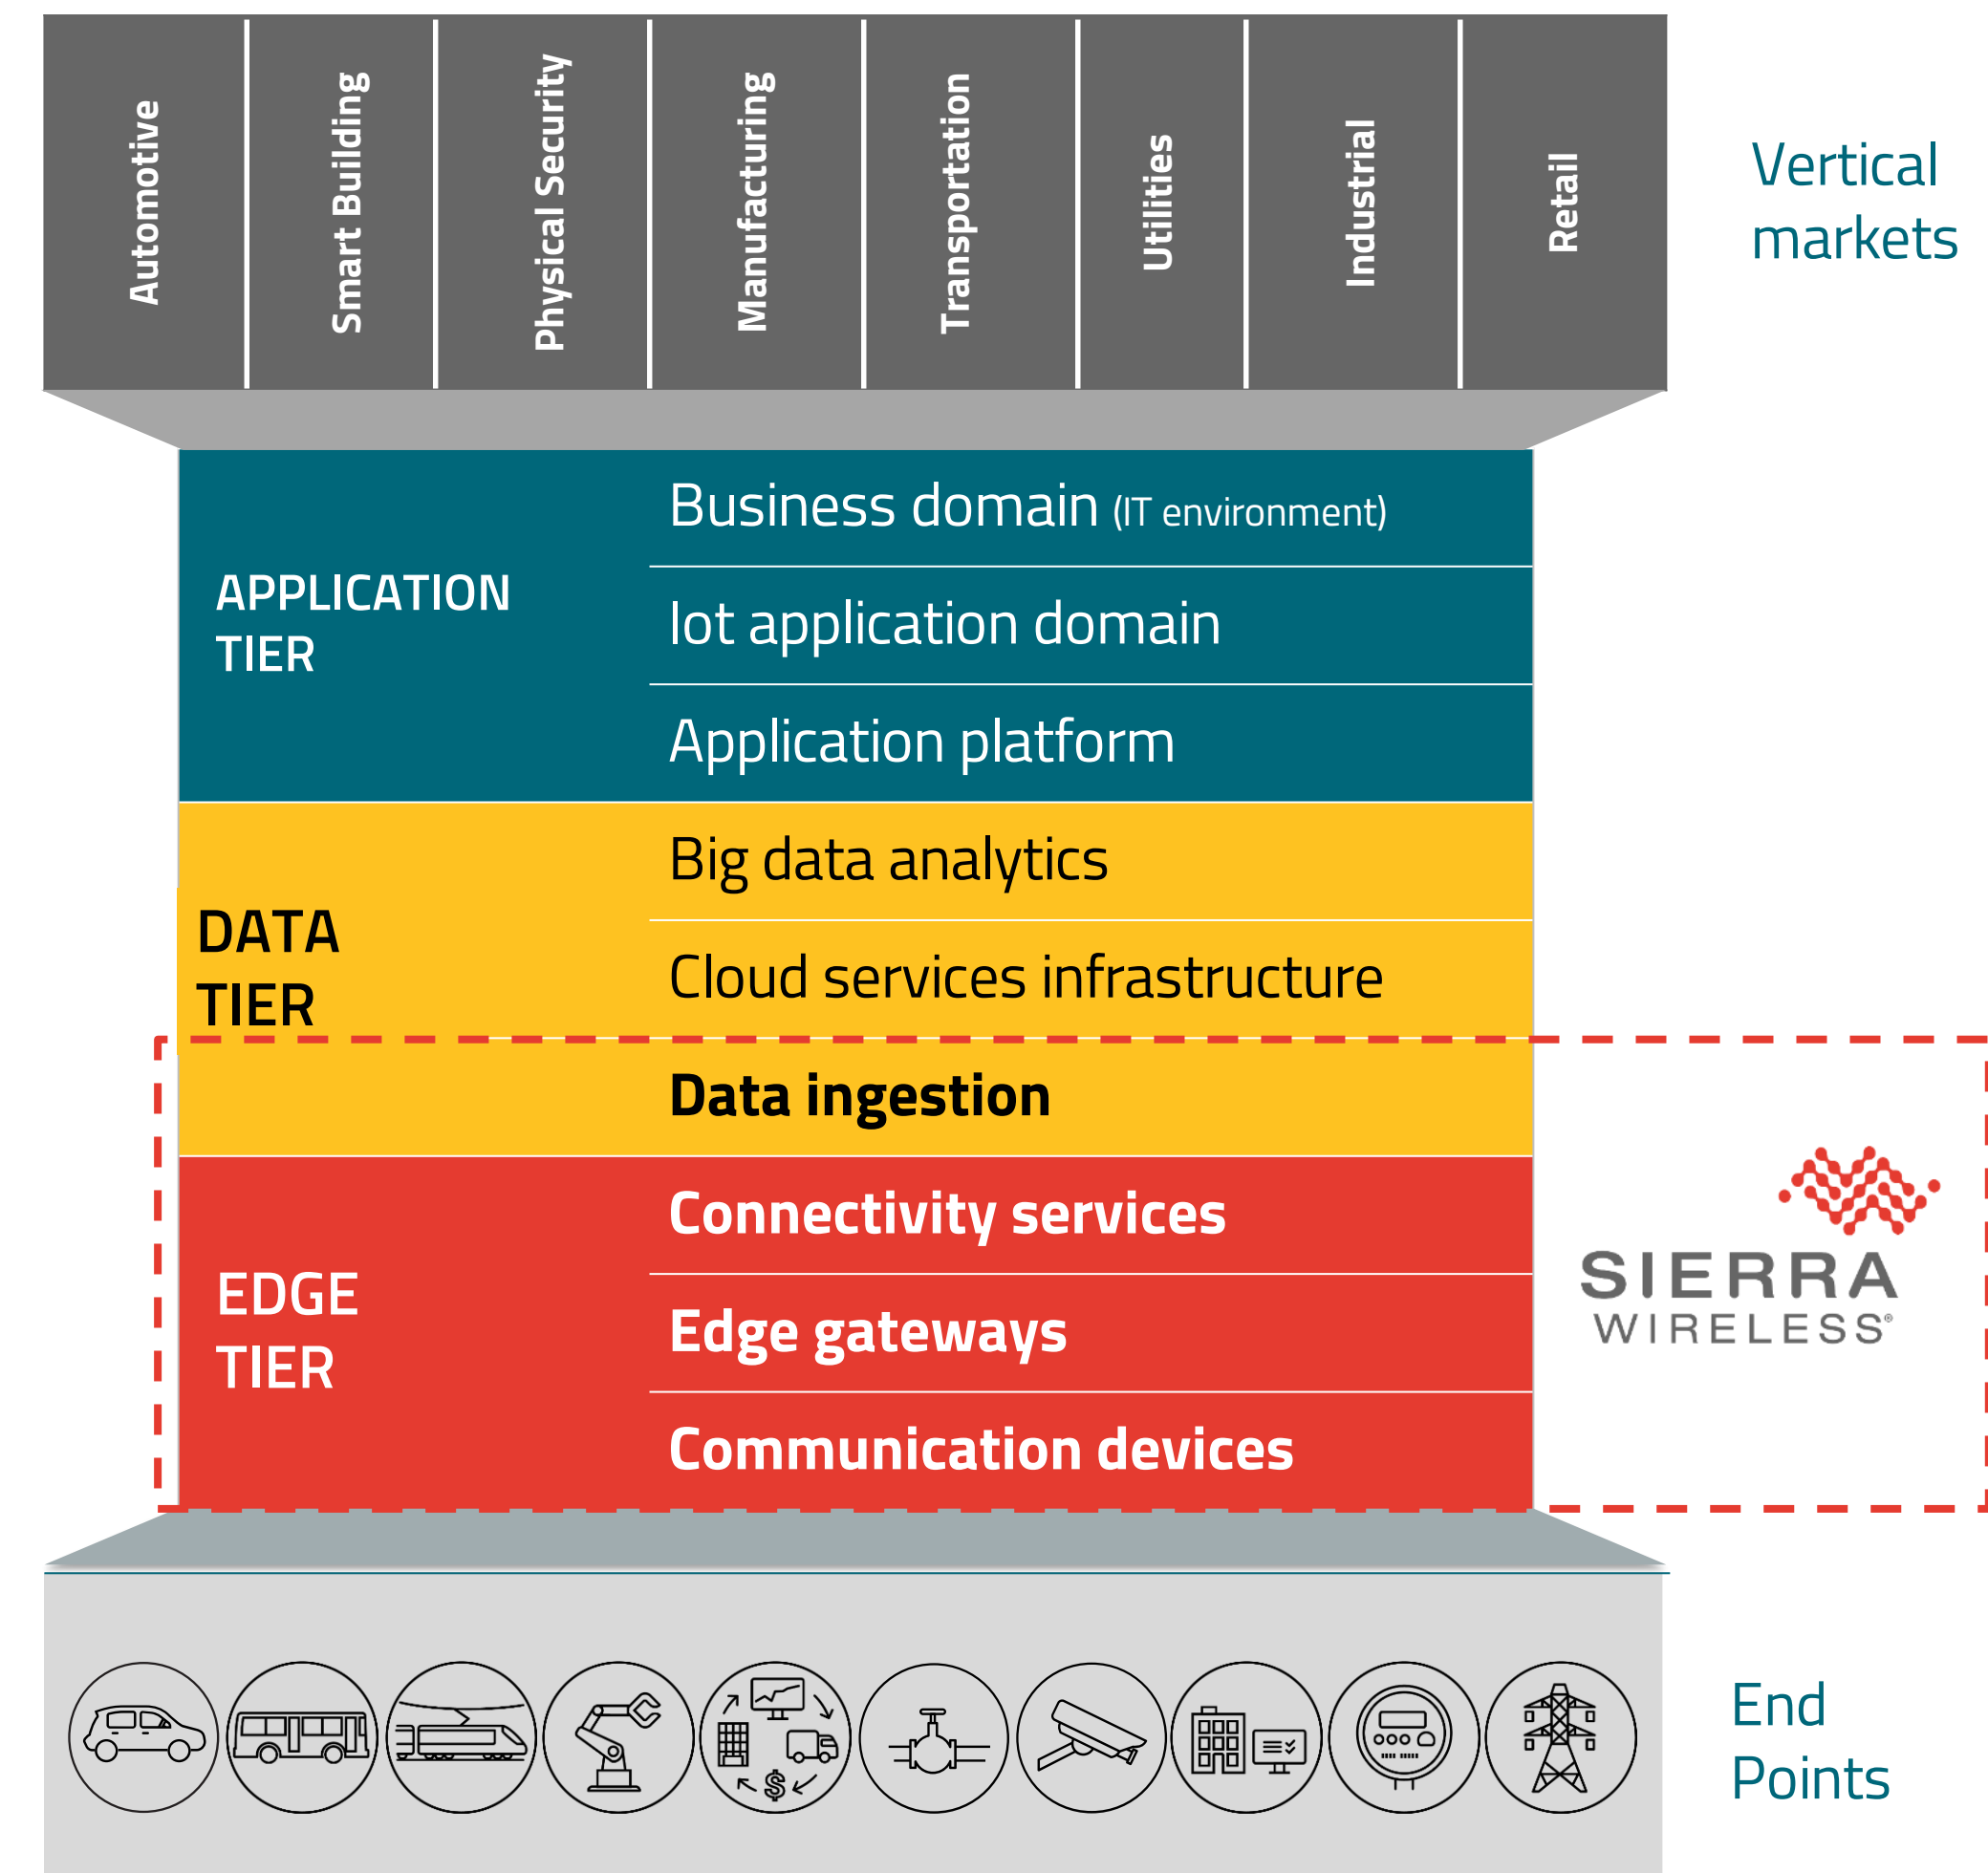

Sierra Wireless Integrated IoT Solutions Combine Key Elements of the IoT Stack to Address Broad IoT Market

IoT Drivers

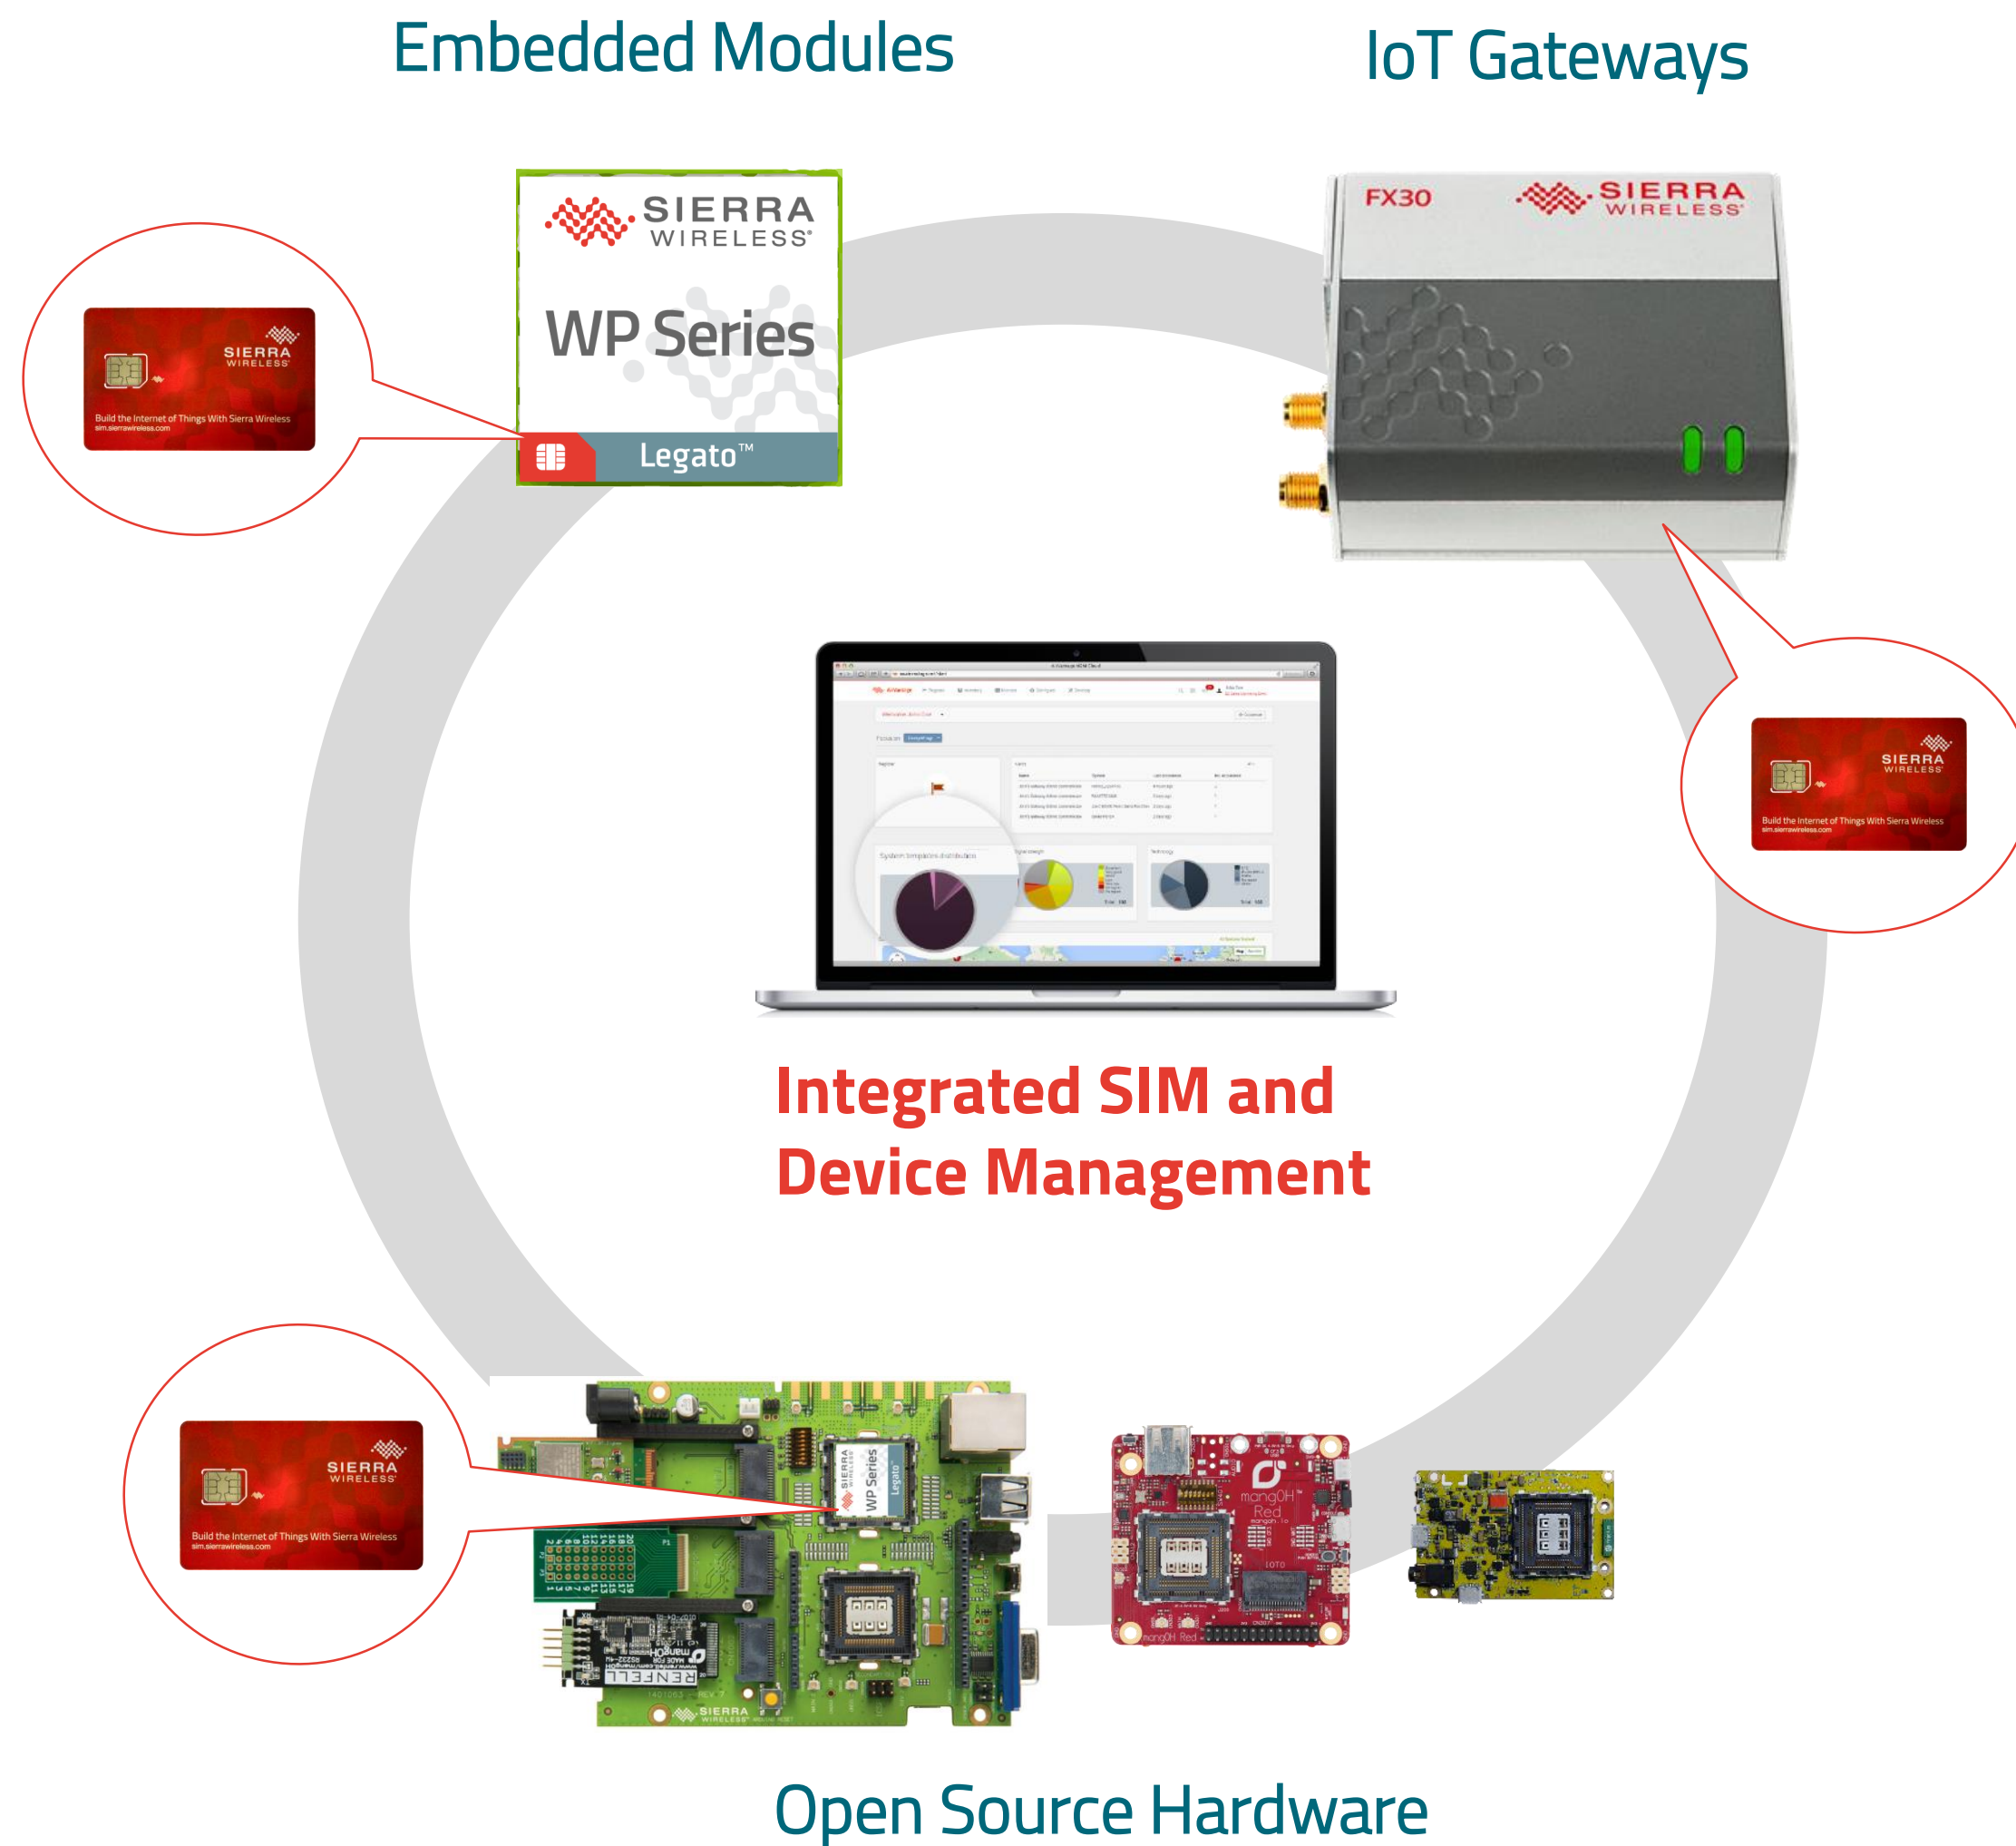

- Improves operational efficiency
- Improves customer engagement
- Improves business models
- Creates new revenue streams

IoT Challenges

- IoT deployments are difficult
- Cyber security concerns
- Shortage of IoT and Analytical skills
- IoT Ecosystem is complex

Industry Leading Device Portfolio - All Smart SIM Enabled

Multi-operator, resilient global connectivity

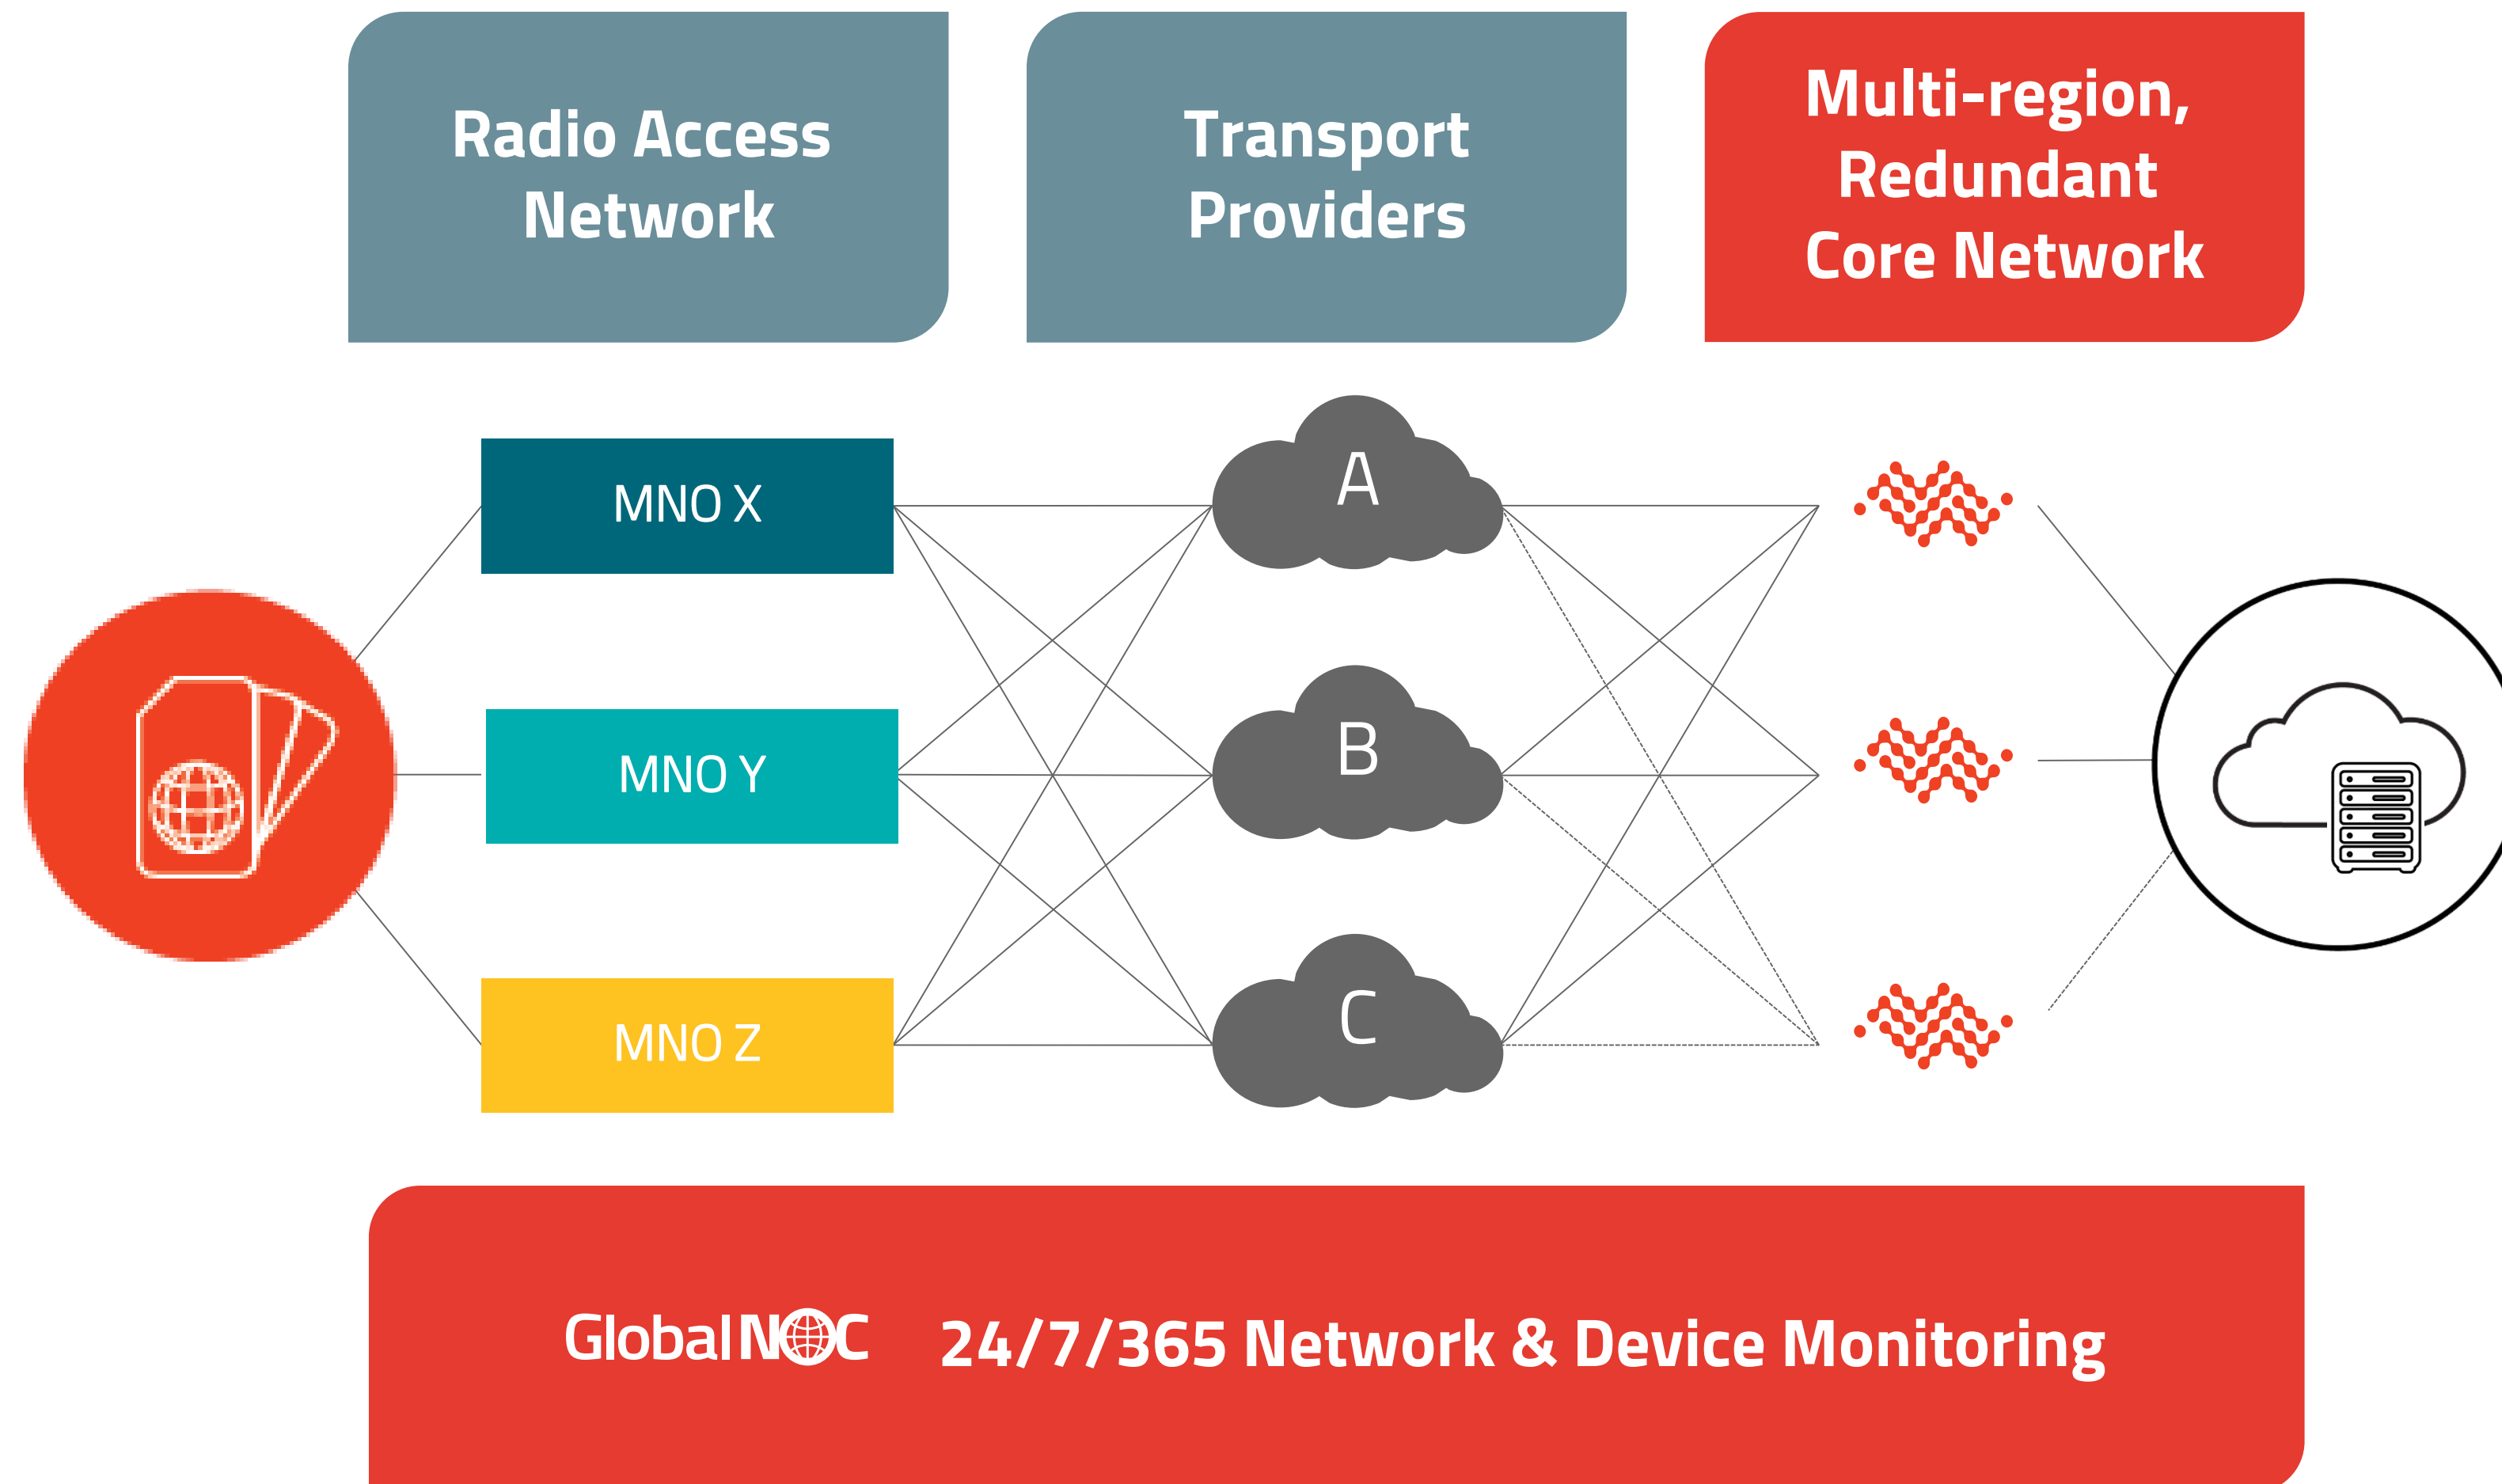

eUICC enabled to support local operator profiles

One contract for device and service, flexible pricing

Global MVNO Built Specifically for IoT

600+ operator networks
160+ countries deployed
84B data points per mth
52M API calls per mth

AirVantage Cloud Powering Sierra Wireless IoT Solutions

Orchestration**

- Leading IoT Platform
- Global customer base
- 3M+ subscribers

- Global redundant infrastructure
- Tightly integrated with MVNO and carrier partners

Seamless Tightly Integrated Device-to-Cloud Security

Trusted, Connected IoT Device

- ✓ Unique ID / factory loaded secret keys
- ✓ Secure boot
- ✓ Secure firmware upgrade
- ✓ Secret key rotation OTA

Highly Available Infrastructure

- ✓ Private network options (APN / IPSEC VPN)
- ✓ Highly resilient network infrastructure
- ✓ Guaranteed SLA (24/7 monitoring)
- ✓ Anomaly Detection

Secure Management Platform

- ✓ Seamless device-to-cloud channel
- ✓ Mutual authentication / data encryption
- ✓ Two-factor authentication
- ✓ IP filtering & access logs

IoT Enterprise Networking Portfolio Focused on Mission Critical, Secure Applications in the Enterprise

KEY TRENDS DRIVING ENTERPRISE ADOPTION OF CELLULAR WAN

- ✓ Gigabit LTE & 5G: higher speeds, lower latency
- ✓ SD-WAN: using multiple links for capacity, reliability, cost
- ✓ Security: segregated network for IoT applications
- ✓ IT/OT Convergence
