

Manage Your AirLink® Routers Locally With the New Canadian ALMS Instance

Why Choose AirLink Management Service (ALMS)?

ALMS is Semtech's cloud management platform designed for AirLink routers. Serving as the control center of your network, it enables you to:

- Manage your services, support and warranty subscriptions, all from a single screen
- Remotely register, configure, manage, secure and troubleshoot your routers
- Deploy firmware and security patches over-the-air with ease

Your AirLink Router includes 1 year of ALMS, through your AirLink Complete Subscription *(see next page)*

ALMS Just Got Closer With a New Canadian Instance

The new ALMS Canadian instance ensures your account, router and user data is processed and stored within Canada, helping you comply with policies or regulatory requirements.

How to Register?

If you already have an ALMS account

- Open a support ticket via our Support web portal to request migration to the Canadian instance: customercommunity.sierrawireless.com
- Semtech support team will take care of the migration process, ensuring a smooth and hassle-free upgrade.

If you don't have an ALMS account

- Create your ALMS account in the new Canadian instance at: <https://cad.airvantage.net/accounts/signup?type=ALMSC>
