### ULTIMATE

AirLink XR80

**Ultimate 5G and Wi-Fi Performance**  
With dual-radio option for ultimate redundancy and coverage

### PERFORMANCE

AirLink XR60

**Compact 5G / Wi-Fi 6 Solution**  
For high-performance connectivity in space-limited and harsh environments

### COMPACT

AirLink RV55

**Low-Power 4G / Wi-Fi 5 Solution**  
Ideal for solar or battery-powered applications

Connecting your critical assets requires real-time visibility, robust security and proactive management of large-scale networks.

**AirLink® services** give you full visibility and control over your network.

**Key features include\*:**

- Remote Management Platform
- Hardware Warranty
- Technical Support
- Advanced Mobility Reporting
- Advanced Hardware Replacement

### Flexible Management Options

AirLink® Network Management Solutions, available in the cloud or on premise, enable you to remotely monitor, configure, secure and control connected AirLink® routers and applications deployed in the field – all from a single screen.
