

Protect Citizens and Remote Assets with High-Speed, Secure Cellular Connectivity

AirLink Pro Router Solutions deliver a fast, reliable and secure way to interconnect your high-resolution video surveillance systems

Maintain real-time views with reduced installation times and cost:

- Maximize high-definition surveillance with a network of cameras working on 5G and Wi-Fi 6
- Monitor remote assets easily with compact, low-power solutions
- Monitor operation of routers 24/7 and deliver over-the-air security updates as needed

AirLink Pro routers are purpose-built to deliver uninterrupted connectivity for video surveillance applications and create a scalable and secure surveillance infrastructure. Pro routers deliver:

- High bandwidth connectivity for interconnecting cameras and surveillance monitoring stations.
- Low power router options for remote cameras that operate on solar or battery power.
- Ruggedized design enabling routers to be used in harsh environments and wide temperature extremes.

SOLUTION COMPONENTS

Ruggedized Routers

End-to-end Security

Remote Management

24/7 Technical Support

A Solution for Your Specific Needs

Mission-critical networking solutions are as diverse as the needs of surveillance systems. That's where AirLink Pro routers come in, offering tailored solutions to fit your unique requirements.

COMPACT ROUTERS

AirLink RX55 delivers LTE Advanced and Wi-Fi 5 connectivity to efficiently connect your surveillance network. With single-Ethernet support, capacity for up to 20 Wi-Fi clients, Cognitive Wireless, and telemetry capabilities, the RX55 is a low-power, cost-effective solution for your remote surveillance needs.

PERFORMANCE ROUTERS

The AirLink XR60 delivers high-performance 5G and Wi-Fi 6 connectivity for organizations looking to future-proof their deployments. With dual-Ethernet option, up to 32 Wi-Fi clients and cognitive Wireless, the XR60 securely connects multiple devices.

ULTIMATE ROUTERS

For the most demanding applications, the AirLink XR80 delivers ultimate 5G and Wi-Fi 6 performance and multi-network connectivity. With dual 5G option, up to 4 Ethernet, 256 Wi-Fi clients, Cognitive Wireless and 5 GPIO it is the ideal solution for installations requiring maximum bandwidth and always-on connectivity.

INTELLIGENT AND SECURE MANAGEMENT

Beyond their robust build, AirLink PRO routers provide intelligent and secure management with remote and real-time monitoring and expert technical support.

- Manage thousands of devices as easily as one: deploy configuration changes, add new routers or update routing policies in just a few clicks.
- Gain valuable insights and manage your entire router installation through a single platform with real-time data, dashboards and automated alerts.
- Optimize your deployment, management and troubleshooting costs with remote management and expert technical support.
- Add an extra layer of security by requiring on-premise authorization of all cloud-triggered operations and by isolating your operational network from the management network with the Hybrid Cloud option.
- Gain critical insight into the state of your router installation.

You can count on Semtech

FIELD-PROVEN PERFORMANCE

With more than 30 years of cellular experience, Semtech is a trusted provider of wireless solutions for surveillance applications.

PURPOSE-BUILT FOR SECURE RUGGED OPERATIONS

Unlike desktop routers built for office use, AirLink Pro routers are purpose-built and military/industry tested (MIL-STD-810 and IP64) to survive in extreme environments.

TRUSTED PARTNER

All our solutions come with comprehensive services to ensure your devices operate securely and at peak performance. We support our customers with 24/7 technical support, always-on remote management, unrestricted access to firmware and security updates and hardware warranty with AirLink service subscriptions.
