

Semtech Antenna – 3-in-1 SharkFin

The 3-in-1 sharkfin antenna provides a 2x2 MiMo cellular 5G/4G (617-960/1710-4200MHz) with L1/L5 GPS/GNSS in a compact sharkfin style antenna housing.

The cellular elements are omnidirectional allowing easy placement of the antenna on the vehicle and the antenna can be installed on a conductive or non-conductive panel without significant detriment to performance. The sleek sharkfin styling creates a low visual impact on vehicles and the compact footprint allows installation where roof real-estate is limited including between the ribs on a Ford Explorer / Interceptor. The antenna is installed using a single M18 / ¾" hole maximising vehicle resale value and seals to IP69K when properly installed protecting the antenna and vehicle from water ingress. The antenna is supplied with 4m (13') long low loss flame retardant coaxial extension cables to simplify installation. The cables are compliant with UN ECE R118 making the antenna suitable for installation on buses and coaches.
