Wireless Retail Solutions
Accel Networks + Sierra Wireless

AirLink Intelligent Gateways + Accel Networks
Robust Fixed Wireless for Retail Network Challenges

BUSINESS GRADE WIRELESS CONNECTIVITY
Accel Networks and Sierra Wireless provide a highly reliable wireless alternative to address a retailer’s need for:

• Alternative to wired broadband
• Backup + Redundancy
• Rapidly deployable

By standardizing on the Sierra Wireless line of AirLink intelligent gateways, Accel Networks has created a comprehensive solution that allows multi-location organizations to focus on business expansion by eliminating network downtime, and identifying robust connectivity options for hard to reach locations. In addition, Accel Networks offers an industry leading Service Level Agreement (SLA), including PCI compliance to ensure the highest level of up time and service. With Delivery in as little as 3 business days retailers can be up and running when and where business requires.

BROAD NETWORK COVERAGE
Drawing on deep experience in fixed wireless networking, Accel has fused proprietary technology with 3G GSM and CDMA networks to create the first nationwide high-speed fixed wireless enterprise network designed specifically for “mission-critical” applications. Spanning the United States, Canada and Puerto Rico, the Accel + Sierra solution offers clients guaranteed coverage.

PROPRIETARY EQUIPMENT DELIVERING PROPRIETARY RESULTS
ALEOS Intelligence
The embedded intelligence that powers AirLink intelligent gateways coupled with the AirLink device management tools creates an easily configurable platform facilitating a quick path to market for rapidly deployable wireless business continuity and retail solutions.

To support Accel Network’s award winning managed service, ALEOS provides a reliable, persistent connection with the cellular network. Furthermore, ALEOS is embedded with security features, such as IPsec compliant VPN and user access levels, that when combined with Accel Networks’ security protocols enable the highly secure connection for PCI compliance.

AirLink device management tools facilitate comprehensive management of the cellular connection minimizing field service visits and lowering total cost of ownership.

High Performance Antenna
The Accel Maestro antenna delivers the industries highest data rates to maximize throughput and ensure reliability. The solution can be self-installed, and requires no power source facilitating rapid, easy implementation.

For more information on the solutions and purchase instructions contact us at AirLinkSales@sierrawireless.com
How it Works:
Accl Network’s Maestro antenna is integrated with the AirLink Raven X or GX400 for an optimized cellular connection. The solution is deployed in your retail location, and remotely manageable from any location with an internet connection with AccelView and AirLink’s device management software.

Accel Networks:
Unlike any other network in existence today, Accel takes a customer-centric approach to providing broadband connectivity for your locations, and we provide service to more of your locations than any other network carrier. Because of our multi-carrier reach, we select the very best coverage for you - location by location. Combined with our proprietary wireless link enhancement technology, our service is unmatched by any other wireless network for speed, reliability and national coverage.

Features:
- Broad network coverage
- Reliable cellular connection
- PCI compliant
- Rugged, intelligent communications platform
- Proprietary antenna technology
- Health and status monitoring
- Remote management

Benefits:
- Rapidly deployable
- Near 100% up-time
- Lowest cost of ownership
- Guaranteed SLA
- Manage the entire solution from anywhere
- Highly secure
- Eliminates the need for landlines

How to Buy:
For more information on deploying a retail business continuity solution with Accel Networks powered by Sierra Wireless, contact Accel Networks directly at sales@accel-networks.com or contact Sierra Wireless at AirLinkSales@SierraWireless.com.
